

## Home

AASLA is an association of people involved in all aspects of surface land acquisition. Our membership, although comprised mainly of Licensed and Interim Licensed Land Agents, includes individuals closely associated with acquisition activities such as surveyors, appraisers, environmentalists and lawyers. These members provide acquisition services for Oil & Gas, Pipeline, Telecommunications, Railway, Power, Transportation and Municipal requirements. Licensed by the authority of the Province of Alberta and the Land Agents Licensing Act, land agents have been providing acquisition services to these industries since 1968. Our Association has been providing fellowship, education, information and leadership to our members for over 38 years. The renewed growth and interest in AASLA in conjunction with recent events and concerns in our industry lead us to believe that AASLA is on the right path, helping to represent and educate our members in a way which will benefit both industry and the general public. AASLA executive and members meet the first Monday of each month from September to May, as well as host a full day education seminar and golf tournament in June. These meetings take place at the Petroleum Club in Edmonton. At each monthly meeting AASLA brings in guest speakers, whom discuss several different topics surrounding the ever-changing oil and gas industry. AASLA continues to strive towards our mission statement where "AASLA provides the voice and the forum for all Alberta Surface Land Agents".
